

IDC Latin America Covid-19 **Flash** Bi-weekly Service

- 4.78

Value Proposition

April, 2020

Why is this needed?

- With the speed with which Covid-19 has been spreading across the globe, scenario and **product planning has become more challenging**.
- Many traditional IDC research products have very detailed forecasts that are updated every 90-180 days, but **this is not enough for the dynamic situation** the world is facing right now.
- Clients have asked IDC what we can offer for planning purposes using the **research expertise and wide industry contacts** that the analyst teams have in different countries and regions.

What is the IDC Latin America Covid-19 Flash Service?

Quantitative Supply Side Perspective

 Short-term updates (Units and value at product category level for hardware trackers; value for software and services trackers at secondary market level) with different scenario plans for best, probable and worst case. Accompanying forecast assumptions included.
